

CVIT for banking sector

Handling cash in transit remains a primary area of concern, especially for the banking sector, as it involves high level security risks. Garud offers professional and effective cash collection and other security solutions for various banks across the country. This involves protecting valuables and cash while in transit, and also within the business premises. With the use of latest technology we maximise the safety of, not only the cash and valuables, but also the clients.

Garud's capability of working masterly with the aid of advanced technology and skilled manpower has helped us gain the confidence of our clients over the decade, for CVIT services. During the deployment, Garud, at every stage of the transportation process, follows uncompromising measures that guarantees zero risk & safe execution.

Our fleet of purpose built vehicles is spread across an extensive network of local branches, assuring national coverage. Our list of heavily armed vehicles provides options to our client's, as per their specific requirements.

Because we make no compromise with our client's security, we integrate CCTV and intelligent video analysis systems, indoor and perimeter alarm systems and other systems into a single control center. We constantly monitor the progress of vehicles carrying cash and valuables, until they reach the desired destination. So, we leave no stone unturned, to ensure the security of our client's cash and valuables.

Apart from cash, we also provide our service to help move jewellery, bullions and valuable documents. Our efficient integration of technology and skilled personnel, for security solution, is the reason for our success in financial sector, retail business houses and others.

CVIT services 3 types of vehicles in our fleet -
